(e) Hydraulic Data

Hydraulic Data is attached at the end of this section, or data may be obtained from U. S. Army Corps of Engineers web site:  
<http://water.mvr.usace.army.mil>, under the Water Level Archives, Mississippi River Basin, Mississippi River@Lock & Dam 15 Pool, and Mississippi River@Lock & Dam 15 Tail.

(f) River Duration Curve Data.

Daily river gage readings for the Pool at Locks and Dam No. 15 can be obtained from the U. S. Army Corps of Engineers web site:  
 <<http://water.mvr.usace.army.mil>>. When the web-site appears, on the Map for Current, Historical and Forecast data, click on Rock Island. On the next map that appears, click on MI15 located in the lower center portion of the map. On the next page under Historic Data, for Parameter, click on the circle in front of Pool. On the first set of dates, click on the arrow next to the year, and select 1940. Next click on the circle in front of Download, then click on view. This will display an Excel worksheet containing the entire period of record for Pool 15. From this data river duration curves can be constructed. For Locks and Dam No. 15 Tail report, repeat the instructions above substituting Tail for Pool.

(g) Obstruction of Channel

The Government will not undertake to keep the channel free from vessels or other obstructions, except to the extent of such regulations, if any, as may be prescribed by the Secretary of the Army in accordance with the provisions of Section 7 of the River and Harbor Act approved August 8, 1917. The Contractor will be required to conduct the work in such manner as to obstruct navigation as little as possible, and in case the Contractor's plant so obstructs the channel as to make difficult or endanger the passage of vessels, said plant shall be promptly moved on the approach of any vessel to such an extent as may be necessary to afford a practicable passage. Upon completion of the work, the Contractor shall promptly remove its plant, including ranges, buoys, piles, and other marks placed by it under the contract in navigable waters or on shore.

WAGE DETERMINATION APPEALS PROCESS

- 1.) Has there been an initial decision in the matter? This can be:
- \* an existing published wage determination
  - \* a survey underlying a wage determination
  - \* a Wage and Hour Division letter setting forth a position on a wage determination matter
  - \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U. S. Department of Labor  
200 Constitution Avenue, N. W.  
Washington, D. C. 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N. W.  
Washington, D. C. 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
U. S. Department of Labor  
200 Constitution Avenue, N. W.  
Washington, D. C. 20210

4.) All decisions by the Administrative Review Board are final.
