

Project Factsheet for: Little Maquoketa River, Couler Valley, Dubuque, Iowa (COMPLETED)

Date Last Updated: 09/12/2007 14:37

Project Location Information

Location: Little Maquoketa River, Couler Valley, Dubuque, Iowa
River Basin(s): Mississippi
State(s): IA
Congressional District(s): IA-1

Status

The assessment has been completed and it was determined that there is no project that meets Corps interest criteria. The assessment contains a recommended project that the local sponsor could undertake unilaterally that could reduce flooding in the study area. The Corps evaluations and finding were reviewed with the sponsor.

Description

The local sponsor requested that the Corps review flood damage reductions options in the Couler Valley; since the existing control structures are intended only as temporary controls until a permanent flood damage reduction plan can be implemented.

The Initial Assessment study evaluated various structural and non structural flood damage reduction measures to determine if there is a potential project that could satisfy Corps interest criteria.

Summarized Financial Data

| | |
|--------------------------------|----------|
| Federal Allocation for FY 2005 | \$50,000 |
|--------------------------------|----------|

Authority

CA - Continuing Authorities - Section 205 --
