## Description

The River and Harbor Act of 1962 authorized the modification of the Mississippi River 9-foot Navigation Project, between the mouth of the Missouri River and Minneapolis, to provide for the construction and maintenance of 14 small boat harbors and for the maintenance of one existing small boat harbor (Quincy Bay). Two are on the Illinois Waterway and thirteen are on the Mississippi River. The projects were constructed for shallow draft recreational vessels, and projects depths range from 5 feet to 9 feet at LOL.

### Mississippi River

\* Harbors could be dredged in FY08 if funding provided.

### Illinois Waterway

- ▣ The Ivy Boat Club (Small boat - 7')
- ▣ Muscooten Bay (Small boat - 5')

All small boat harbor projects have a local sponsor, usually a municipality. Assurances between the Corps and local sponsor provide for the Corps to maintain adequate access ways, while the local sponsor provides adequate areas and retaining structures for dredged material placement.

Maintenance dredging of small boat harbors is usually accomplished by contract. Harbors have historically been dredged every 2 to 5 years if funding is available.

Funds to maintain the harbors are requested in the yearly O & M budget request, however, a specific request is usually not funded due to low priority. Harbor maintenance usually gets funded through congressional intervention.
