## MISSISSIPPI RIVER

### LOCK CONDITIONS

#### Lock No. 22, UMR Mile 301.2

Beginning at 1900 on Tuesday, 30 October 2012 and until further notice, northbound tows are required to ease out of the lock chamber and upper guidewall until the stern clears the upper guidewall. Mariners should contact the lock on channel 14 regarding proper northbound departure procedures. The practice of heeling off the lockwall (using the lockwall for leverage) will not be tolerated while departing northbound at Lock No. 22.

During this time a contractor will be on site drilling and grouting on the upper guidewall. Deckhands and mariners should exercise caution when transiting this area.
