## Des Moines River Water Control Plan Update

### Public Comment Form

Public input is essential to the Des Moines River Water Control Plan. The project team is interested in hearing your comments below. Questions are provided for example only. Please don't let the questions limit your response and we appreciate any feedback that you could provide us. Fact sheets are available at <http://www.mvr.usace.army.mil/About/Offices/Programs-and-Project-Management/Des-Moines-River-Water-Control-Plan-Update/> for more background information.

1. Are you personally impacted by water levels, either flood or drought conditions, along the Des Moines River? If so, under what river conditions (e.g. a critical river or reservoir elevation) are you impacted and what is the nature of the impact?
2. Do you have any concerns related to the effects of water level management actions on recreational use of the reservoirs or on the Des Moines River?
3. What environmental concerns, comments or observations do you have in regards to reservoir operation or Des Moines River flows?
4. In regards to the way water is managed at Lake Red Rock and Saylorville Lake, what problems and/or opportunities should be evaluated as part of the study to update the water control plans?
