

# Red Rock Master Plan Focus Area - A Natural Place to Play

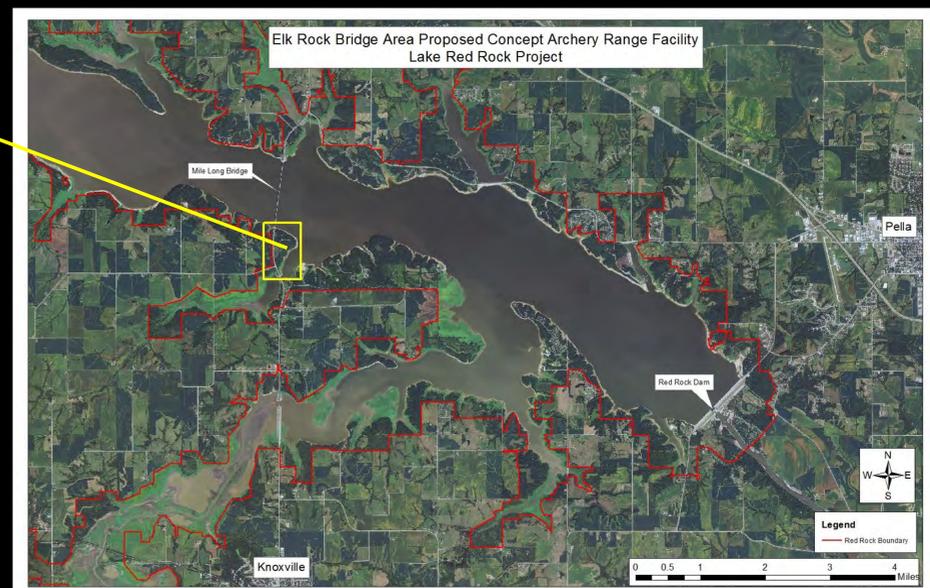

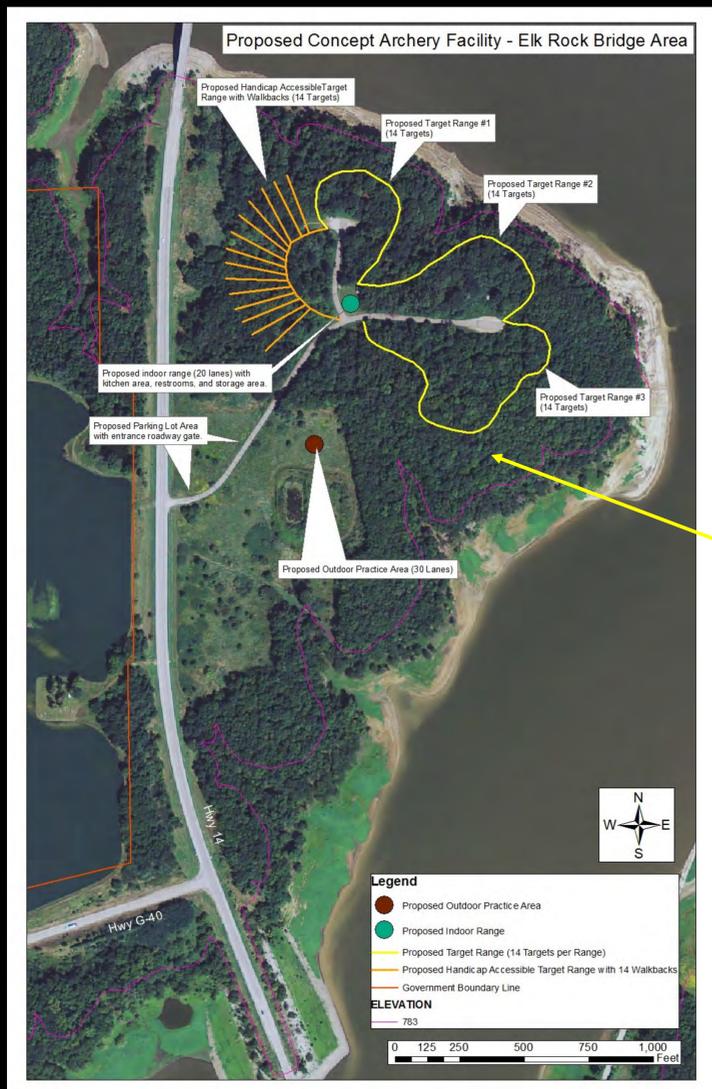

Goal:

- Develop Low Consumptive Active Resource Based Recreation Opportunities

## Archery Range

Archery has become a growing recreational pastime in Iowa. Additionally, there are limited archery experiences on public land in Iowa.

To the left is a conceptual plan for developing the Elk Rock Bridge Area into an Archery Range. This preferred alternative at its final design will have minimal impact to the quality natural resources of the area.

### Move Archery Range to Elk Rock Bridge Area

#### Benefits

1. Target areas will be out of flood pool at new location.
2. Larger area available for parking for routine and event participants.
3. Archery range and associated facilities are compatible with low intensity recreation designation recommended for the Elk Rock Bridge Area.
4. Overnight occupancy facilities will not be permitted.
5. Strong partnership potential.
6. Focus group input.

### Current Facilities at Robert's Creek Archery Range
