

Red Rock Master Plan Focus Area - Connections

Goal: Protect/enhance access to public lands

Public access to public ground and agency access to continue healthy environments at landlocked public lands.

Acquiring road easements from Marion County

Example: 76th Ave

This road provides access to a 1,000 acre peninsula of native woodlands. This road was acquired from Marion County to continue to provide public access to public ground. Currently the Corps of Engineers is working with Marion County on seven more remote roads.

76th Ave Before

76th Ave After

Additional easements on private ground are needed to continue to provide public and agency access to public ground.
