

Red Rock Master Plan
Focus Area - Healthy Environment

Goals:

- Eliminate Invasive Species within ESAs & Important Environmental Units

THE MAIN INVADERS:

AUTUMN OLIVE

Eleagnus umbellata

CHINESE BUSH

CLOVER

Lespedeza cuneata

HONEYSUCKLE

Lonicera sp.

There are many other invasive species that threaten Environmental Sensitive Areas and Important Environmental Units at Lake Red Rock including: Asian Carp, gypsy moth, emerald ash borer, zebra mussels, and many more.

Before Autumn Olive Removal

After Autumn Olive Removal
