

Project Factsheet for: Coralville Lake, Iowa - Operations & Maintenance

Date Last Updated: 08/31/2007 13:31

Project Location Information

Location: Coralville Lake, Iowa
River Basin(s): Iowa / Cedar
State(s): IA
Congressional District(s): IA-2

Status

Project in operation. Base level funding deficits in FY07 and FY08.

Continued flat line budgets have caused increased strain on project service levels. Additional FY08 funding in the amount of \$3,841,000 would return the functions above back to the project and perform much needed maintenance items such as a) riprap/repair the bank erosion at the Tailwater East site; and b) service road repairs; c) stabilize the Amana levee; d) complete boundary surveys in flagrant encroachment areas and e) outlet works rehab and bulkhead purchase.

Description

Coralville Lake is a multiple purpose project providing primary benefits in flood control and low-flow augmentation and secondary benefits in recreation, fish and wildlife management, forest management, and water quality improvement. The dam is located on the Iowa River just upstream of Iowa City. Cumulative damages prevented since project's inception = \$60,173,700. The project includes 24,591 acres of fee title lands and there are 11 recreation area sites. At conservation pool, the lake is 4,900 acres in size and the flood control pool is 24,800 acres with 475,000 acre-feet of storage. FY06 recreation fee receipts and lease revenues were \$446,543. The project was put into operation in 1958. Regional economic impact of project visitation is \$20,307,710.
