

THE INCREMENTAL COST OF TRANSPORTATION CAPACITY IN
FREIGHT RAILROADING

The Tennessee Valley Authority
Knoxville, Tennessee

and

The Center For Business and Economic Research
Lewis College of Business
Marshall University
Huntington, West Virginia

July, 1998

The Tennessee Valley Authority (TVA) and the Center for Business and Economic Research (CBER) have prepared this report at the request of the U.S. Army Corps of Engineers. However, the material and analysis contained herein are those of the authors and do not necessarily represent the positions of TVA, the CBER, or Marshall University.

CONTENTS

Executive Summary.....	ES-1.
1. Introduction and Motivation.....	1.
2. U.S. Railroad Capacity	5.
2.1 Overview	5
2.2 The Determinants of Link Capacity.....	10.
2.2.1 Traffic Mix and Line-Haul Characteristics.....	10.
2.2.2 Terminal Facilities	13.
2.2.3 Deregulation and Railroad Mergers	14.
2.3 Carrier Incentives for Capacity Expansion.....	15.
3. Modeling Railroad Capacity	18.
3.1 Line-Haul versus Terminal Capacity.....	18.
3.2 Modeling Line-Haul Capacity	19.
3.2.1 Route Links and Link Capacity.....	19.
3.2.2 Measuring Observed Traffic	24.
3.2.3 Model Specification.....	25.

4.	Railroad Capacity for Upper Mississippi Basin Shipments	36.
4.1	Capacity Costs.....	36.
4.2	Traffic Diversions and Alternative Traffic Flows	40.
4.3	Line-Haul Capacity and Capacity Costs.....	44.
4.4	Terminal Capacity.....	54.
5.	Conclusions and Summary Comments	59.

Appendices

- Appendix 1 Using Geographic Information Systems to Collect Rail Route Link Attribute Data
- Appendix 2 Using Geographic Information Systems to Calculate Route-Specific Traffic Volumes
- Appendix 3 Calculating the Cost of Railroad Line-Haul Trackage
- Appendix 4 Examples of Incremental Increases in Route Segment Capacity
